

AB CIVIL RETAINING ANNOUNCES JV PARTNERSHIP WITH KEYSTONE TO DELIVER

TIER 1 RETAINING INFRASTRUCTURE

BUILDING STRONGER FOUNDATIONS. TOGETHER

AB Civil Retaining (ABCR) is proud to announce an exciting new joint venture with Keystone International to expand our design-and-construct retaining solutions across Queensland and Northern NSW.

This JV combines the international strength of the Keystone retaining wall system, already trusted by global licensees such as Brickworks and National Masonry, with AB Civil Retaining's proven reputation for professional delivery and innovation on the ground.

Importantly, the JV will also be backed by AB Plant & Equipment Hire, ensuring the heavy lifting, cranes, and specialised machinery required for major infrastructure projects are always available and operated by skilled teams. This gives Tier 1 contractors and project owners a complete, turnkey package: supply, design, construction, and plant support all under one roof.

With the TMR-approved Key Steel system, the JV is positioned to serve the Tier 1 infrastructure sector with confidence and capability — from concept and engineering through to delivery.

WHAT THIS MEANS FOR THE INDUSTRY:

- **Guaranteed product supply** through licensed manufacturers Brickworks and National Masonry.
- **Proven performance** with Key Steel, approved by the Department of Transport and Main Roads.
- **End-to-end delivery capacity** with AB Civil Retaining.
- **Plant and lifting solutions** from AB Plant and Equipment Hire, ensuring projects are resourced and delivered at scale.

"This partnership gives project owners and Tier 1 contractors something the industry has been waiting for — reliability, innovation, and the confidence that every retaining project will be backed by world-class product, machinery, and professional execution" said Kris Armstrong, Managing Director of AB Civil Retaining.

Together, AB Civil Retaining, Keystone International, and AB Plant & Equipment Hire are committed to scaling rapidly and supporting major infrastructure projects across the region, with an ambitious growth strategy that will see the JV expand its impact over the next five years.
